FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

In the Matter of

Amendment of Section 73.202(b)) RM-8160
Table of Allotments) MM Docket 93-33 /
FM Broadcast Stations)
(Oakhurst and Firebaugh, California)

To: Chief, Allocations Branch

REPLY COMMENTS

California Sierra Corporation, licensee of KAAT(FM), Channel 296A in Oakhurst, California (hereinafter "CSC") initiated this rulemaking. It requested that Channel 276A be substituted for Channel 296A in Oakhurst, California. In order to accommodate that substitution, CSC also requested that Channel 234A be substituted for Channel 276A in Firebaugh, California. In response, the Commission issued its Notice of Proposed Rulemaking, DA 93-143 (released March 2, 1993) seeking public comment on the substitutions proposed by CSC.

CSC filed Comments on March 16, 1993 re-asserting its interest in the proposed substitutions. CSC also committed to apply for Channel 276A if allocated to Oakhurst and, if authorized, that it would promptly construct the facility.¹ Several

¹ CSC refiled its Comments on April 30, 1993 since, in reviewing the Commission's public reference room files for other comments or counterproposals, CSC discovered there was no record of CSC's comments. Perhaps this is because its comments were received by the FCC's FM Branch on March 16 and were not forwarded to the Secretary's office. In any event, CSC has timely expressed its continued interest in the proposed substitutions.

other comments and/or counterproposals have been filed in this proceeding. CSC files this Reply Comment in response.

A. Linda Ware.

Linda Ware filed "Comments and Counterproposal." She advances a counterproposal requesting that Channel 296A not be deleted at Oakhurst, California, but be allocated as Oakhurst's second FM service. Her counterproposal was not filed until April 23, 1993, one day after the deadline for submitting counterproposals in this proceeding. Since her counterproposal was not timely advanced, it must be rejected. See Rule 1.420(d).² Counterproposals must be technically and procedurally correct at

(released September 3, 1992) at n. 4; see also, Eldorado, Oklahoma, et al., 5 FCC Rcd. 6737 (1990).

Finally, Ms. Ware failed to include an affidavit verifying that the statements contained in her petition were accurate to the best of her knowledge. Rule 1.52 requires that any document

such, its alternative counterproposal to allocate Channel 276B1 to Oakhurst is technically deficient and should be denied. See cases cited supra.

Central Valley's comments and/or counterproposal should also be dismissed for its failure to properly serve petitioner's counsel as directed in the Notice of Proposed Rulemaking. Although Central Valley purports to have served counsel, the Certificate of Service indicates service was made at "8260 Greensboro Drive" instead of the correct address, "8280 Greensboro Drive." Central Valley's comments were never received by undersigned counsel.

C. Patrick R. Ryan.

Mr. Ryan is the licensee of KMMF-FM in Madera, California. He supports the proposed substitutions in the Notice of Proposed Rulemaking. He notes that, "The proposed substitution will lead to an opportunity to resolve a great deal of technical interference."

D. Bass Lake School District.

Bass Lake School District (Bass Lake) also submitted comments supporting the proposed channel substitutions. Bass Lake notes that the proposed substitutions would allow an increase in power for KAAT-FM and "would significantly improve the station's ability to provide coverage to the city of license." Bass Lake also notes, "Because of the mountainous terrain in the Oakhurst area, the ability of this 3 kilowatt

receiving the station, have recently received interference from adjacent stations. The additional power will improve to a relative degree the ability of KAAT-FM to meet its community service obligations."

E. Golden Oak Bank.

Golden Oak Bank submitted comments supporting the proposed channel substitutions.

F. Yosemite Union High School District.

Yosemite Union High School District filed timely comments supporting the proposed substitutions. These comments are for the most part identical to comments submitted by the Bass Lake School District.

* * *

CSC again states its continued interest in the channel substitutions as proposed in the Notice of Proposed Rulemaking. If Channel 276A is allocated as contemplated in the proposed rulemaking, CSC will expeditiously file an application and, if granted, construct facilities as authorized on Channel 276A.³

Respectfully submitted,

Re: Response to Petition for Rule Making: Don Stewart
Rule Making Proceeding
Oakhurst, California

Dear Mr. Fitch:

Today I received a copy of the Petition for Rule Making filed by Don Stewart to add allocation 276-A/103.1 in the FM table to June Lake, California. I have researched several alternative frequencies and find them to be available for Mr. Stewart. They are:

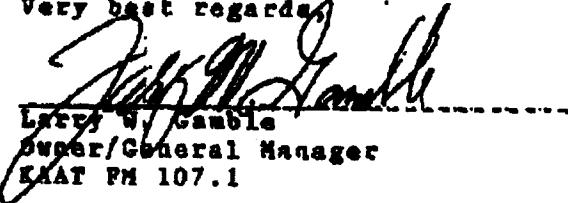

1. 237A+/95.3
2. 245A+/96.9
3. 262A+/100.3
4. 288A+/105.5
5. 297A+/107.3
6. 299A+/107.7

All of these channels are clear for immediate rulemaking request and application to the FCC!

Once again, as with the Silke/Ware counter proposal, other frequencies are indeed available for June Lake, California. Why must they ask for 276-A/103.1? We don't have any other available frequencies! They do!!

I trust that the FCC will see with our proposal, the value of granting our Rulemaking Request even in consideration of this frivolous Petition for Rule Making.

Very best regards,

Larry W. Gamble
